

Permeable or impermeable?

Materials which let water through are **permeable**. Think of things like a grass football pitch or a sand on a beach.

Materials which do not let water through are **impermeable**. Think of things like a hard tarmac road, a pavement, or a plastic paddling pool.

Here is a picture of a school and school playground.

Colour permeable surfaces green
Colour impermeable surfaces grey

Cross out the wrong words:

Impermeable surfaces **do / do not** let water through.

Permeable surfaces **do / do not** let water through.
